Bring Dakota Marketplace data directly into your tools

REQUIRED PACKAGE

LP Data – US & Canada

Institutional and private wealth investor coverage across the U.S. and Canada, including pensions, RIAs, family offices, endowments, and foundations.

ADD-ON PACKAGES

LP Data – International

Global dataset of institutional and private wealth investors across Europe, the Middle East, Asia-Pacific, the Nordics, and beyond.

GP Data

Manager profiles, fund details, and investment intelligence across private equity, private credit, real assets, and venture capital.

Financial Advisors

Comprehensive view of financial advisors across major broker-dealers, wirehouses, and independent channels.

13F Data

Institutional holdings and ownership data from quarterly SEC filings across equities and funds.

Private Company Data

Profiles of private companies and executives for sourcing, mapping, and relationship development.

Metro Areas

Geographic coverage of allocators and advisors segmented by metropolitan area for territory planning and targeted outreach.

Searches & RFPs

Active LP searches, open RFPs, and pacing plans across institutional allocators.

Investments

LP commitment and allocation history across fund strategies and vintage years.

Transactions

M&A activity, deal flow, and corporate transaction data across private markets.

News

Investor and transaction news feeds, continuously refreshed across allocators and private market activity.

Job / Role Changes

Personnel movement tracking across investment firms, allocators, and advisors.

Private Funds

Profiles and details across 57,000+ private funds including strategy, vintage, and fundraising status.

Conferences

Conference attendance data and scheduling intelligence across institutional investment events.

Performance & Benchmarking

Fund performance data and benchmark comparisons across private market strategies and vintage years.

Full Access

Full Dakota Marketplace API access — all datasets, global coverage, complete intelligence.

Custom Data

Tailored data solutions built to your specifications — combine fields, filters, and datasets to match your unique workflow needs.
